bananas

3.
eggs

4.
pork

5.
shrimp

6.
bread

Save

Question 4 (1 point) Question 4 Unsaved

Dr. Norwood doesn't say that farmers feed Stillwater, because that would ignore the many people who played an important role in bringing the food to consumers.

Question 4 options:

True

False

Save

Question 5 (1 point) Question 5 Unsaved

For every dollar a consumer spends in a grocery store, how much money is paid to the farmer for their contribution?

Question 5 options:

\$0.27

\$0.03

\$0.16

\$0.48

Save

Question 6 (1 point) Question 6 Unsaved

Given how much of the dollar spent at the grocery store is given to farmers, it is clear that what happens at the farm is more important than what happens to food after it leaves the farm.

Question 6 options:

True

False

Save

Question 7 (1 point) Question 7 Unsaved

Markets are simply a series of trades, where food is property that changes hands from one person to another until it is finally eaten.

Question 7 options:

True

False

Save

Question 8 (1 point) Question 8 Unsaved

One reason regions trade with one another is that each region is better at producing some goods than other regions, where "better" means it is produced at a lower cost. This is referred to as _____ advantage.

Question 8 options:

relative

comparative

monetary

absolute

Save

Question 9 (1 point) Question 9 Unsaved

If two regions have the exact same climate, soil, and resources, neither region can benefit from trading with the other.

Question 9 options:

True

False

Save

Question 10 (1 point) Question 10 Unsaved

States like Kansas are able to produce enormous amounts of wheat because the wheat not consumed in the state can be exported to other regions.

Question 10 options:

True

False

Save

Question 11 (1 point) Question 11 Unsaved

Being able to trade allows regions to specialize in a good, and specialization allows them to hone their skills and adopt expensive technologies.

Question 11 options:

True

False

Save

Question 12 (1 point) Question 12 Unsaved

Even the production of spinach involves many businesses that specialize in a particular function of spinach production. Select all specializations discussed in the video. Do not select specializations that were not discussed in the video, even if they are good examples of specialization.

Question 12 options:

Designing the advertisements to promote the spinach

Producing the can that stores the spinach

Producing the tractors used by the spinach farmer

Producing the label on the spinach can

Producing the spinach

Save

Question 13 (1 point) Question 13 Unsaved

Why does technological progress in agriculture partly depend on trade with other regions? Though there could be many answers, select the one answer described in the video

Question 13 options:

Trade allows bigger farms, who can better afford new technologies

Trade encourages warfare, which, after the war, has spillover effects into agriculture

Trade encourages economic stability, which increases investments into technologies

Trade encourages the use of patents, especially if it is a democracy trading with an autocracy

Save

Question 14 (1 point) Question 14 Unsaved

Why does technological progress in agriculture partly depend on trade with other regions? Though there could be many answers, select the one answer described in the video.

Question 14 options:
