Exam 3 will be given on April 23. You may only use a calculator, not a smartphone, to crunch numbers. Remember to bring your orange scantron sheet. The last two questions you will answer on your test booklet though, as they are not multiple choice questions.

There are 32 questions and 44 possible points. Unless the question states otherwise, each question is worth one point. Some are worth more than one point though.

The questions and the material they refer to are below
